

Assignment Day – 3

1. List 5 common issues users face with USB keyboards or mice on laptops, and write one possible solution for each.

No.	Common issues	Possible solution
1.	Keyboard or mouse is not detected	Unplug and reconnect it to another USB port
2.	Mouse or mouse is not working	Restart the laptop and reconnect the device
3.	Mouse cursor moves slowly or stops	Clean the keyboard and check for demand keys
4.	Some keyboard keys do not working	Clean keyboard and check for damage keys
5.	USB device keep disconnecting	Try another USB port or check the USB cable for damage

2. **Simulate a troubleshooting flow: Your Bluetooth headphones are not connecting to your phone. Write the exact step-by-step actions you would take to diagnose and fix the issue, mentioning any settings or indicators you would check.**

1. **Check Bluetooth** – Open phone settings – Bluetooth and make sure Bluetooth is ON
2. **Check headphones** – Makes sure the headphone turned ON and have enough battery
3. **Enable pairing mode** – press and hold the headphone power/Bluetooth button until the indicator light starts blinking
4. **Check available device** – in the phone's Bluetooth settings, look for the headphone name under Available Devices.
5. **Connect** – Tap the headphone name and select Pair/Connect
6. **Forgot the device** – if it was already paired but won't connect, tap the headphone name – Forgot/Unpair, then pair it again
7. **Restart Bluetooth** – Turn Bluetooth OFF, wait a few seconds, and turn it ON again
8. **Restart both device** – Restart the phone and turn the headphones off and on.
9. **Check other connections** – make sure the headphone are not connected with already phone or laptop
10. **Reset headphones** – if nothing works then perform factory reset of the headphones and try again to pair

- 3. A user reports that their external webcam is not detected during a Zoom call on Windows 10. Write a checklist of 6 things to check or try to resolve the problem. Hint: Consider device manager, privacy settings, and app permissions.**

- a) Check the USB connection** – Unplug the webcam and connect it to another USB port
- b) Check Device Manager** – open Device manager -> Cameras and make sure the webcam is detected and enable
- c) Check windows privacy settings** – Go to setting -> privacy -> camera and allow camera access
- d) Allow app permissions** – Make sure Allow desktop apps to access your camera is turned ON
- e) Check zoom camera settings** – open Zoom -> settings -> video and select the external webcam as the camera

4. **You are helping a friend whose printer is showing 'offline' status on their PC. Describe how you would use the Windows Troubleshooter tool to try to fix the issue, and explain what information the tool provides during the process.**

Steps to Use Windows Troubleshooter for Printer Offline Issue

1. Open Settings → Go to Devices → Printers & scanners.
2. Select the printer that shows Offline.
3. Click Manage → select Run the troubleshooter.
4. Windows will check common problems such as printer connection, drivers, and printer settings.
5. Follow the instructions shown by the troubleshooter to fix the detected problem.
6. After the process finishes, check whether the printer status has changed to Ready/Online.

Information Provided by the Troubleshooter

- Shows what problem was detected.
- Tells whether the printer is connected and responding.
- Checks for driver or configuration problems.
- Shows whether Windows was able to fix the problem automatically.
- If it cannot fix the issue, it provides suggestions or further actions.
