

Assignment Day – 1

1. Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Device	Type	Real-Life Use Case
Printer	Inkjet Printer	Printing college assignments and color photos.
Printer	Laser Printer	Printing office documents quickly in large numbers.
Printer	Dot Matrix Printer	Printing bills and invoices in banks or shops.
Scanner	Flatbed Scanner	Scanning certificates, photos, and documents.
Scanner	Handheld Scanner	Scanning barcodes or small documents while moving.
Webcam	USB Webcam	Attending online classes and video meetings.
Webcam	Built-in Webcam	Making video calls on a laptop using apps like Zoom or Google Meet.

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage

Hint: Think about speed, convenience, and compatibility.

Connection Interface	Advantage	Disadvantage
USB	Fast and stable connection.	Needs a cable.
Wi-Fi	Wireless, so no cable is needed.	Requires a Wi-Fi network.
Bluetooth	Easy to connect wirelessly over a short distance.	Slower than USB and has a limited range.

4. **Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.**

❖ **Device : Printer**

1. Place the printer near your computer and connect the power cable.
2. Turn on the printer.
3. Connect the printer to the computer using a USB cable.
4. Wait for the computer to detect the printer.
5. Install the printer driver if required.
6. Print a test page to make sure the printer is working correctly.
